Green Ship Technologies

EcoLoadMaster V.1.0.0 Loadicator Software

OUR SOFTWARE:

At Green Ship Technologies, we are dedicated to providing practical tools that improve efficiency and safety in the maritime industry.

Ecoloadmaster, our Loadicator Software, is designed to optimize vessel loading operations and support smooth, safe and efficient workflows.

It simplifies how loading tasks are managed on board, giving your crew user-friendly, reliable features that help reduce risks, save time and improve overall performance. Developed in line with current maritime standards and best practices, Ecoloadmaster supports your team in working with accuracy and confidence.

Using Ecoloadmaster means choosing consistent performance, safer operations and a higher level of reliability, reflecting the commitment and expertise of Green Ship Technologies.

ECOLOADMASTER:

can be installed in the following ship types.

Oil Tankers

Cargo Ships

Bulk Carriers

Passenger Vessels

Chemical Tankers

Container Vessels

Offshore Support Vessels

Ro-Ro Vessels

Accommodation Crane Barge

AHTS vessels

Pipe Lay Vessels

Diving Support Vessels

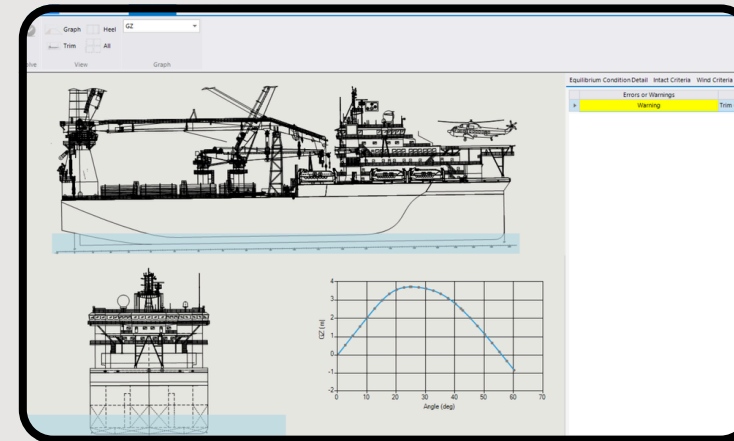

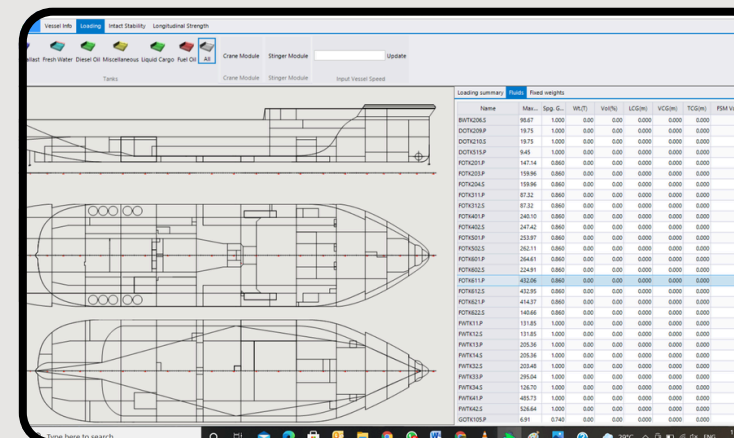

SOFTWARE MODULES

Green Ship Technologies offers a suite of specialized modules within the ECOLOADMASTER – Loadicator Software to support safe and efficient vessel operations:

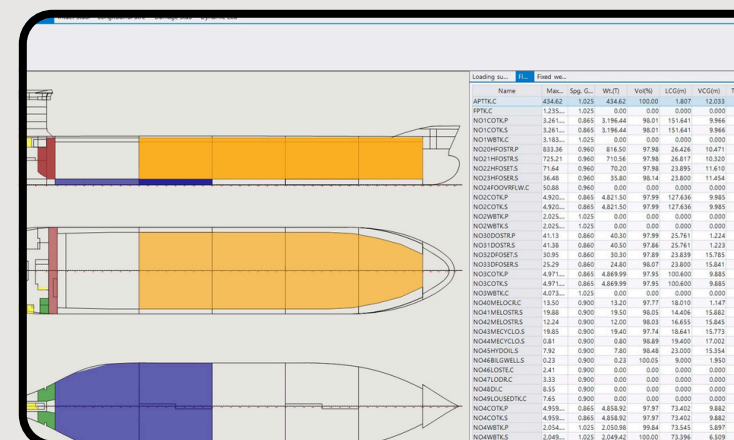

Software Modules:

Intact Stability

Damage Stability

Longitudinal strength

Crane Module

Pipe Lay Module

Cargo Ship Module

Container Module

Ro-Ro Ship Module

DeckLoading Module
Ullage & Sounding

ECOLOADMASTER – LOADICATOR SOFTWARE PROJECTS

Green Ship Technologies has successfully implemented Loadicator Software on more than 50 vessels, covering a diverse range of vessel types including DSVs, OSVs, tankers, container vessels, Ro-Ro ships, multi-purpose vessels, Pipe Laying Crane Vessels, and others.

Our Loadicator Software is trusted by vessel owners, managers, and shipyards for its proven reliability, precision, and user-friendly interface, supporting safe and efficient loading operations across the maritime sector.

PROJECT HIGHLIGHTS INCLUDE:

- ✓ Installed on DSVs, OSVs, tankers, container vessels, Ro-Ro ships, multi-purpose vessels, Pipe Laying Crane and others.
- ✓ Real-time load and stability tracking
- ✓ Includes crew training and ongoing technical support
- ✓ Compliant with IMO, Class and flag state requirements

Green Ship Technologies

APPROVED BY VARIOUS CLASSIFICATION SOCIETIES

EcoLoadMaster V.1.0.0 - Loadicator Software is approved by various leading classification societies.
